Distortion Filter Volume

The image shows a custom PCB for a guitar pedal named 'Die Rat v.1'. The board is populated with several components:

- Input:** A 1/4" input jack connected to the 'IN' pin.
- Power:** A 9V battery connected to the 'V+' and 'GND' pins. Three 18650 lithium-ion batteries are connected to the 'F3', 'F4', and 'F5' pins.
- Control:** A volume potentiometer is connected to the 'V' pin.
- Output:** A 1/4" output jack is connected to the 'OUT' pin.
- Indicator:** A red LED is connected to the 'LED+' pin.
- Connections:** A 6-pin terminal block is used for external connections, including a speaker and a power source.
